yes go ahead and cancel the workshop appointment, they will have to deal with any comments from the meeting.

> Sorry – I sent the other reply before I saw this answer. They have submitted all the paperwork and checks for site plan application. They are asking to be on for February, so I will put them on the February 14th agenda and cancel the workshop if that is what they want. Okay with you??

> When I saw this, and it was only once to my knowledge, it was unclear what and how we were going to process their request. The last I understand, we will be processing a site plan application.

> Email them back and tell them to make a complete site plan application, including full EAF, and a narrative of what is being proposed. We will deal with it as part of the agenda. If they don't want to avail themselves of the workshop, it is fine with me.

> Fuss & O'Neill is working with the Beaver Dam Lake Water Corporation (the "Corporation") to help them implement some upgrades to their facility. We have submitted a Sketch Plan to the Planning Board and are asking to be placed on February's agenda. It was reported to us by Bob Roth, who actually delivered the plans, that we are supposed to schedule a workshop meeting before you'll put us on the agenda.

>

>

>

> Please be advised that we already met formally with Mark Edsall on November 30, 2006 to discuss the proposed upgrades and, prior to that meeting, we sat down with members of the Corporation, the Town Supervisor, Town Attorney and Engineer to discuss the project. MHE has seen the plan at least twice and we left copies of the plan with Mr Edsall. We do not believe that another workshop meeting would be productive at this point in time.

>
> Please note that the Corporation is applying for funding through the Drinking Water State Revolving Fund (DWSRF). The DWSRF is administered by the Environmental Facilities Corporation (EFC). In order to submit an Application to EFC, the applicant must initiate the SEQR process as required by law for the proposed upgrades. This Corporation is member funded and not owned by an outside entity. It will be relying on the funding through EFC to assist with the formal design, so getting the SEQR process going is essential.
